

Population Change 2000-2050

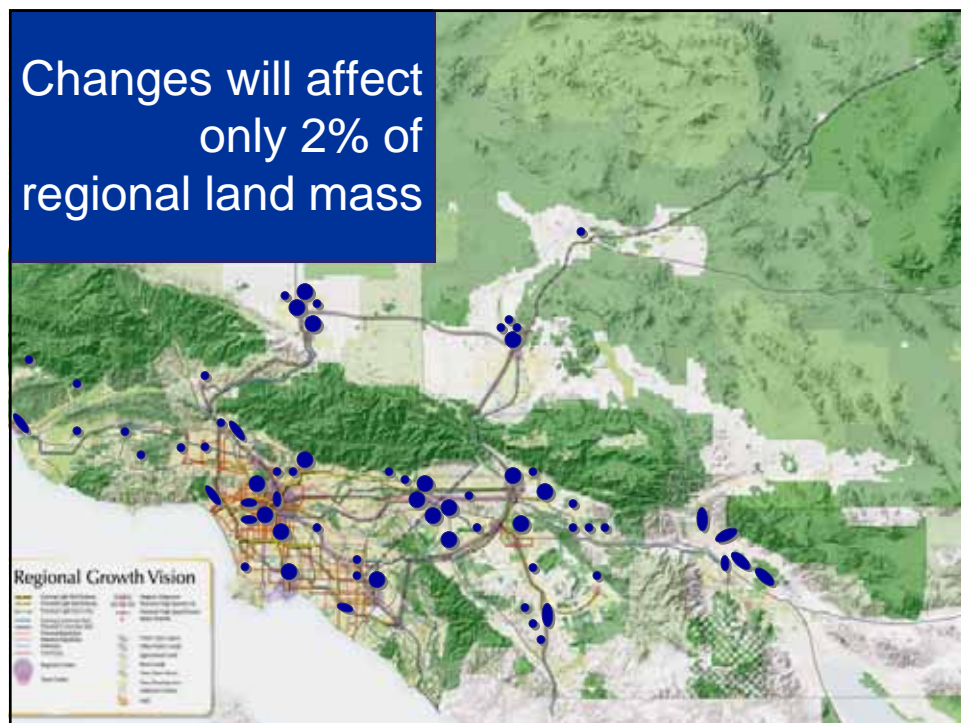

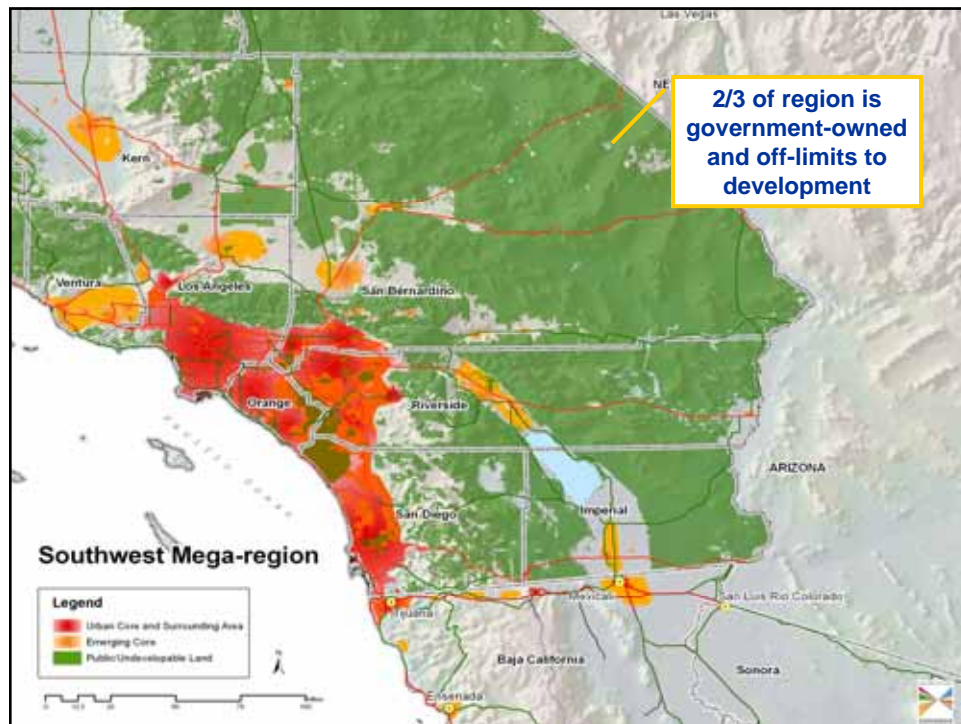

Translation

- U.S. population expected to grow by 430 million by 2050, a 40% increase over current levels
- This would require that we develop four times as much land as we have in the past 250 years

Global Gateway Regions

- Global Gateway Regions are extended networks of metropolitan centers linked by interstate highway and rail corridors.
- Between now and 2050, more than 2/3 of the nation's population growth, and as much as 2/3 of its economic growth, will occur in emerging Global Gateway Regions.

Decentralized Airport System with High-Speed Rail System
